

Rohan Pandit

Finance Analyst — Financial Reporting, Reconciliation & Variance Analysis

Pune, Maharashtra | +91 97667 30753 | panditrohan63@gmail.com | [linkedin.com/in/rohan-pandit-finance](https://www.linkedin.com/in/rohan-pandit-finance) | [Portfolio](#)

SUMMARY

Finance professional with 3+ years' experience in financial reporting, reconciliation, and variance analysis, managing Rs. 1Cr+ in funds and reviewing Rs. 50L+ in monthly transactions. I reconcile reporting data against the general ledger, investigate variances between actuals and plan, and build the dashboards and models that keep P&L and balance sheet numbers accurate and audit-ready. Comfortable working with stakeholders across functions to explain what's driving the numbers and where controls need tightening. Currently building on this with a focus on capital markets and banking-sector finance.

WORK EXPERIENCE

Senior Finance Executive — Training & Educational Centre for Hearing Impaired, Pune *Feb 2024 – Present*

- Led monthly financial reporting and close activities for Rs. 1Cr+ in donor funds, ensuring P&L and balance sheet figures were accurate and delivered on time.
- Reconciled reporting data against the general ledger across Rs. 50L+ in monthly transactions, identifying and resolving discrepancies to keep records audit-ready.
- Partnered with senior stakeholders to explain variance drivers between actual and planned results, supporting month-end review and planning decisions.
- Built standardized financial reports and dashboards to improve visibility into fund performance, spending trends, and control adherence.
- Redesigned reporting workflows and introduced targeted automation, cutting reporting turnaround time by 20% without compromising accuracy.

Finance & MIS Analyst — Amaha Mental Health Care, Mumbai

Oct 2022 – Jan 2024

- Supported budgeting, forecasting, and month-end reporting across multiple client accounts, tracking actuals against plan and flagging variances.
- Coordinated with cross-functional teams to reconcile data and maintain consistent, audit-ready reporting.
- Built financial models and business cases, including a 5-year model with NPV, IRR, and sensitivity analysis, to support investment evaluations.
- Analyzed DPO, DSO, ROCE, and Cash Conversion Cycle to flag risk and inform business recommendations.
- Automated a large part of the reporting process using Excel and Power Query, cutting manual effort by around 25%.

SKILLS

Tools & Platforms: Advanced Excel (Pivot Tables, Power Query, Power Pivot), PowerPoint, Power BI, SQL, SAP

Technical: P&L & Balance Sheet Reporting, GL Reconciliation & Break Resolution, Variance Analysis, Financial Reporting & Dashboards, Financial Modelling & Business Cases, Month-End Close, Capital Markets Fundamentals

Soft Skills: Cross-Functional & Cross-Region Business Partnering, Attention to Detail, Process Improvement, Self-Starter & Deadline-Driven

RELEVANT PROJECTS

FP&A Dashboard & MIS Automation Model

- Built an Excel-based dashboard for automated MIS reporting and KPI tracking across multiple locations.
- Used Power Query and dashboard automation to support variance analysis and improve reporting efficiency.

Financial Modelling & Profitability Analysis Case Study

- Built a 5-year financial model evaluating revenue growth, profitability, and investment feasibility under multiple scenarios.
- Applied forecasting, sensitivity analysis, NPV, and IRR techniques to support business-case decisions.

DCF Valuation & 3-Statement Financial Model — Infosys Ltd. (Independent Practice Project)

- Built an integrated 3-statement model (Income Statement, Balance Sheet, Cash Flow) with 5-year forecasts.
- Performed DCF valuation using FCFF, Terminal Value (Gordon Growth), and WACC (CAPM), with sensitivity analysis on WACC and terminal growth.

EDUCATION

Bachelor of Commerce — Pune University | 2023 | 8.46 CGPA
